CATAMARANS

SEAWIND 1270

BUILT FOR ADVENTURE.
DESIGNED FOR LIFE.

“Our latest design release, the Seawind 1270, is the result of decades of refinement in catamaran design, drawing from our proven Seawind DNA. We work around core principles that define how we feel a true cruising catamaran should perform.

We've preserved our essential features our owners love, introducing modern lines and exciting new features whilst also utilizing the latest technology and engineering.”

RICHARD WARD
FOUNDER & CEO

SPECIFICATIONS

Overall Length	12.83m	42 ft
Beam	6.95m	22' 10"
Draft	1.17m	3' 10"
Displacement MAX	9.5T	9.5T
Engines (2x Inboards)	2 x 21kW	2 x 29 Hp
Fresh Water tank	1 x 600L	158.5 USG
Fuel	2 x 250L	2 x 66 USG
Air draft	18.8m	61' 8"
Saloon & Cockpit headroom	1.98m	6' 6"
Steering	Cable	
Underwing Clearance	0.89m	2' 92"
Mainsail	74.4m2	800.8 ft2
Jib	29.4m2	316.5 ft2
Cabins	3 / optional 4	
Sleeps	8	
Holding Tanks	P=117; S=102L	P=31; S=27USG
Mast Height	17.35m	56' 11"
Waterline Length	12.81m	42 ft

EXPANDED COMFORT & SPEED

The new Seawind 1270 is 400mm longer and 120mm wider offering greater interior comfort, stability and performance.

Like all Seawinds, the new 1270 is designed and built to Category A, unlimited offshore certification.

Each hull is widened 60mm with a new underwater hull shape that retains the gentle windward experience but is optimised for increased performance and speed both on & off the wind.

The extra width combined with more vertical topsides provide significantly more interior space.

WIDER. LONGER.
OFFSHORE PROVEN.

PERFORMANCE MEETS VOLUME

The foredeck and front beam have been raised to create flat decks from stern to stem.

This has improved open ocean capability but also massively increased interior volume, especially in the forward queen bed cabins.

Optimized underwater hull shapes and a raised Carbon Composite Fore-beam deliver superior wave clearance and enhanced off-the-wind performance.

CONTROL IN COMPLETE COMFORT & SAFETY

The signature Seawind Tri-fold Door system merges the saloon and cockpit into one expansive, open living area.

Twin protected helm stations offer 360-degree visibility from behind a major bulkhead, ensuring safety and protection from the elements.

Taller 810 stanchions with four lifelines, and wider transoms with aft boarding step turn safety into assurance, allowing the safe on-off boarding and inspiring confidence with every horizon.

REDESIGNED FOR VOLUME & LIGHT

The headroom of the saloon and the bedrooms is raised to 1.98m, creates the utmost comfort for the living space aboard.

The 1270 is available in either the three cabin, galley down version which has been a hallmark of Seawind's success over many years or the beautifully designed three cabin, galley up version. Within the galley up version, a forward-facing navigation station has been added.
